DETAILED ACTION

Acknowledgment

1. The amendment filed on 07/28/2003, in response to the Office action mailed on 06/27/2003 has been entered. The present Office action is made with all the suggested amendments being fully considered. Accordingly, pending in this Office action are claims 1, 12 and 14-16.

Election/Restrictions

2. Applicant's election without traverse of species 7 (fig. 4A) in a communication filed on 07/18/2003.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 412 and 414. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 12 and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Dalal et al. (US 6,344,234).

7. Regarding claim 1, Dalal (e.g. fig. 6) shows an under-bump metallurgical structure between the bonding pad 12 of a die 10 and a solder bump 23 made from a lead-tin alloy or a lead-free alloy, comprising: a metallic layer 16 over the bonding pad; and a buffer metallic structure 18 between the metallic layer.

8. Regarding claim 12, Dalal shows that the buffer metallic structure includes a mini bump between the metallic layer and the solder bump.

9. Regarding claim 14, Dalal shows that the principle constituent of the mini bump 18 is lead (col. 6/lis. 15-32).

10. Regarding claim 15, Dalal shows that the principle constituent of the mini bump 18 is lead tin alloy (col. 6/lis. 15-32).

11. Regarding claim 16, Dalal shows that the percentage of lead and tin in the lead tin alloy constituting the mini bump 18 is about 95% lead and 5% tin (col. 6/lis. 15-32).

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jao et al., Chow et al., Kwon et al. and Naya disclose structures and procedures similar to the instant invention.
